## Services

Clifton Mercedes recommends on all vehicles 1998 and newer a lube, oil and filter service every 5,000 miles (synthetic). On models older than 1998 lube, oil and filter recommended every 3,500 miles.

### A Service:

Engine oil and filter change, reset maintenance service counter, check exterior lights, inspect tires (incl. pressure) and brakes, check battery and spare tire, check and top-off fluids. See service manual for additional information.

### B Service:

Engine oil and filter change, replace dust filter, reset service counter, check exterior lights, inspect tires (incl. pressure) and brakes, check battery and spare tire, check and top-off fluids, remove wheels and rotate if needed/able. See service manual for additional information.

Additional Work to be performed together with the Respective Service

- Once at 39,000 miles (recommended 45,000 mile intervals after by Clifton Mercedes)
- Automatic transmission – oil and filter change
- Transfer case – oil change (4matic models)

At every 52,000 miles or 4 years

- Check condition of driveshaft flex discs
- Replace engine air filter element (recommended every 15-20,000 miles by Clifton Mercedes)

At every 65,000 miles or 5 years

- Replace fuel filter
- Recommend differential service (Clifton Mercedes recommended)

Every 2 years

- Replace brake fluid
- Replace engine coolant (water/anticorrosion/antifreeze mixture) (Clifton Mercedes recommended)
- Check suspension and body structure for damage/corrosion

Spark Plug intervals

- Most vehicles 2006 and newer spark plugs are recommended every 78,000 miles or 5 years. See service manual for additional information.
